viRepelA[®] ELITE™

powered by **LUMISHIELD**

BEST PERFORMING
PORTABLE AIR PURIFIER
IN ITS CLASS

FOR PEOPLE WHO **CARE**
ABOUT THE QUALITY OF THEIR **AIR™**

Introducing the viRepel Air Purifier Elite. The **Best Performing Portable Air Purifier** in its class.

No other portable air purifier combines the speed, air flow process, and user-friendly features of the viRepel AP Elite.

Best Performance for any space

- **BEST FOR LARGER AREAS** – The viRepel AP Elite is the only portable air purifier in its class to meet CDC standards of six Air Changes per Hour (ACH) in spaces over 600 square feet*, up to 1375 square feet.
- **BEST FOR SMALLER AREAS** – High performance in smaller spaces means exceptional purification at lower noise levels

* Using CDC standard eight foot ceiling height

viRepel Air Purifier Elite.

Best Performing Portable Air Purifier

BEST-IN-CLASS Clean Air Delivery Rate (CADR)

HOSPITAL INSPIRED air flow processing

OPTIMIZED radial clean air dispersion

LOWEST maintenance & easy to use

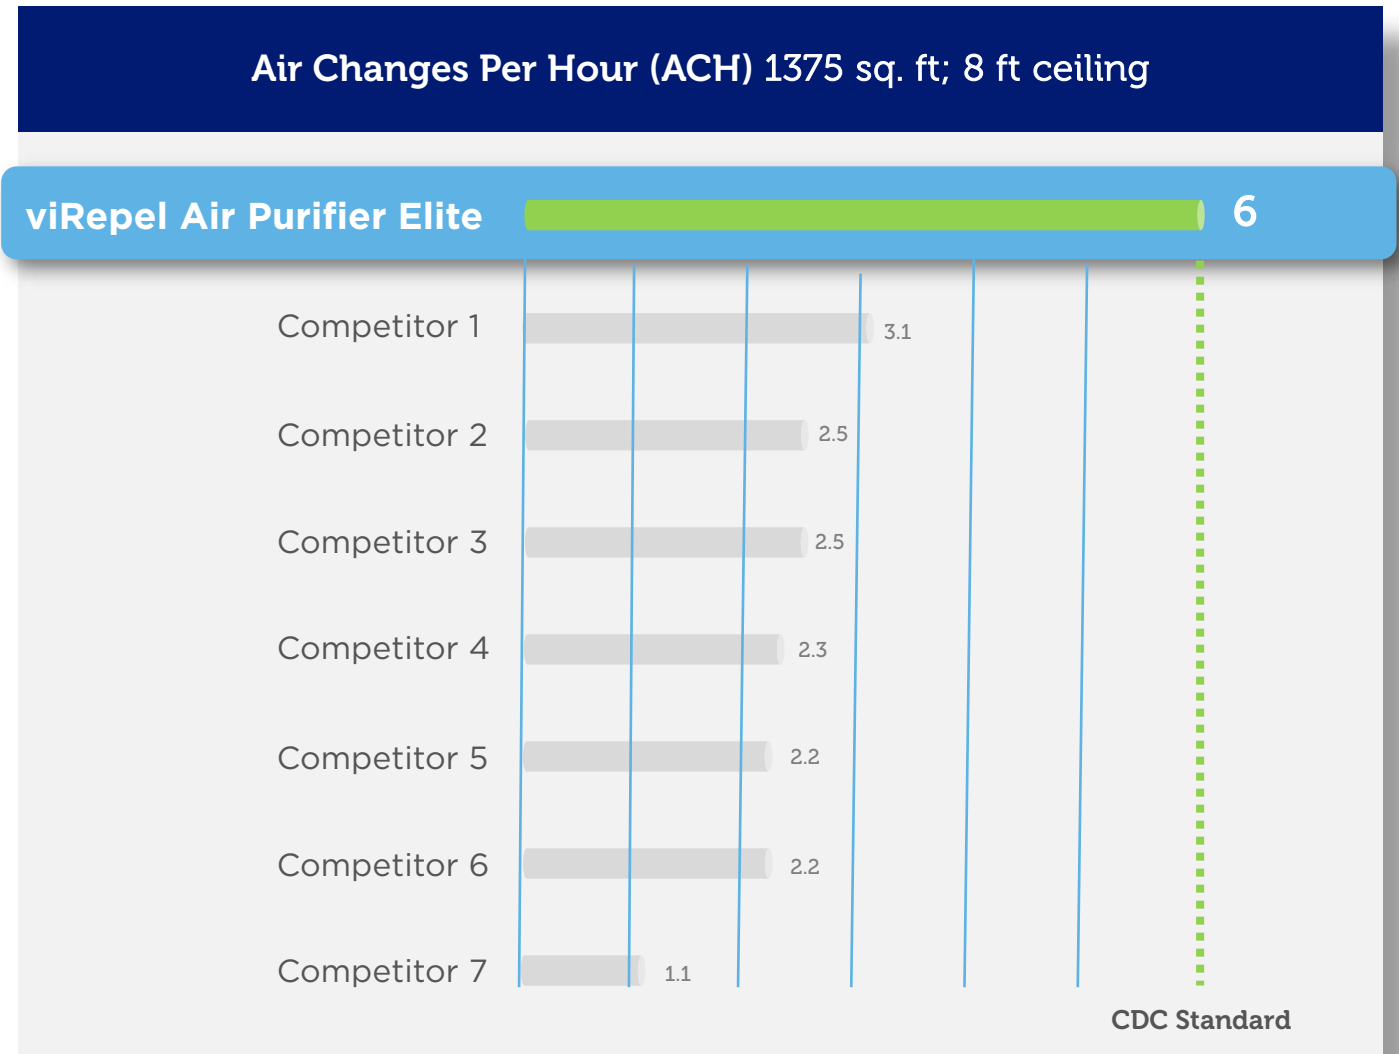

BEST-IN-CLASS Air Changes Per Hour (ACH)

Air Changes per Hour (ACH) is another measure of air purification efficiency.

The viRepel AP Elite is the only portable air purifier that achieves 6x ACH for any space over 600 square feet*...up to an amazing 1375 square feet!

For spaces under 600 square feet, the viRepel AP Elite exceeds 6x ACH and can be run at reduced speeds while still achieving 6x ACH.

* Assumes 8 ft ceiling height

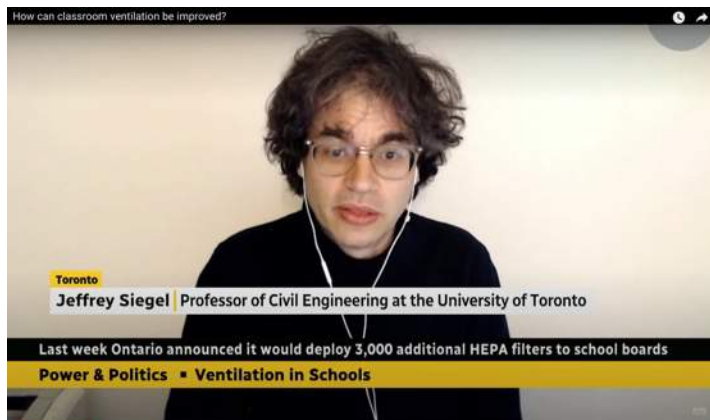

BEST-IN-CLASS Clean Air Delivery Rate (CADR)

Clean Air Delivery Rate (CADR) is the most important measure of an air purifier's performance. CADR is measured in Cubic Feet per Minute (CFM) of clean air produced.

The viRepel AP Elite achieves a CADR rate that is almost 2x faster than our nearest portable competitor.

Because speed matters!
Don't take our word for it...

Clean Air Delivery Rate (CADR) (Cubic Feet per Minute)

viRepel Air Purifier Elite

1100

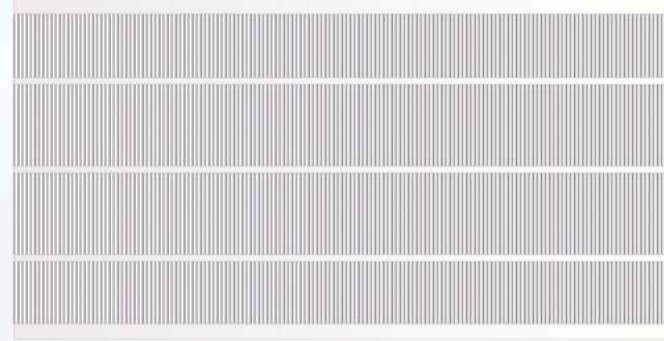

BEST-IN-CLASS Clean Air Delivery Rate (CADR)

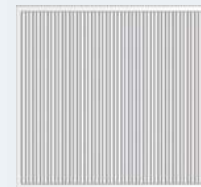

The viRepel Air Purifier Elite uses Lumishield technology that includes the [largest HEPA H13 filter you can get](#) in a portable air purifier, capturing 99.95% of harmful particles

In fact, the viRepel AP Elite HEPA filter is [10x the surface area of a typical air purifier](#).

A larger HEPA filter means MORE clean air flow and LESS frequent filter changes.

Lumishield HEPA H13 - 10x the surface area

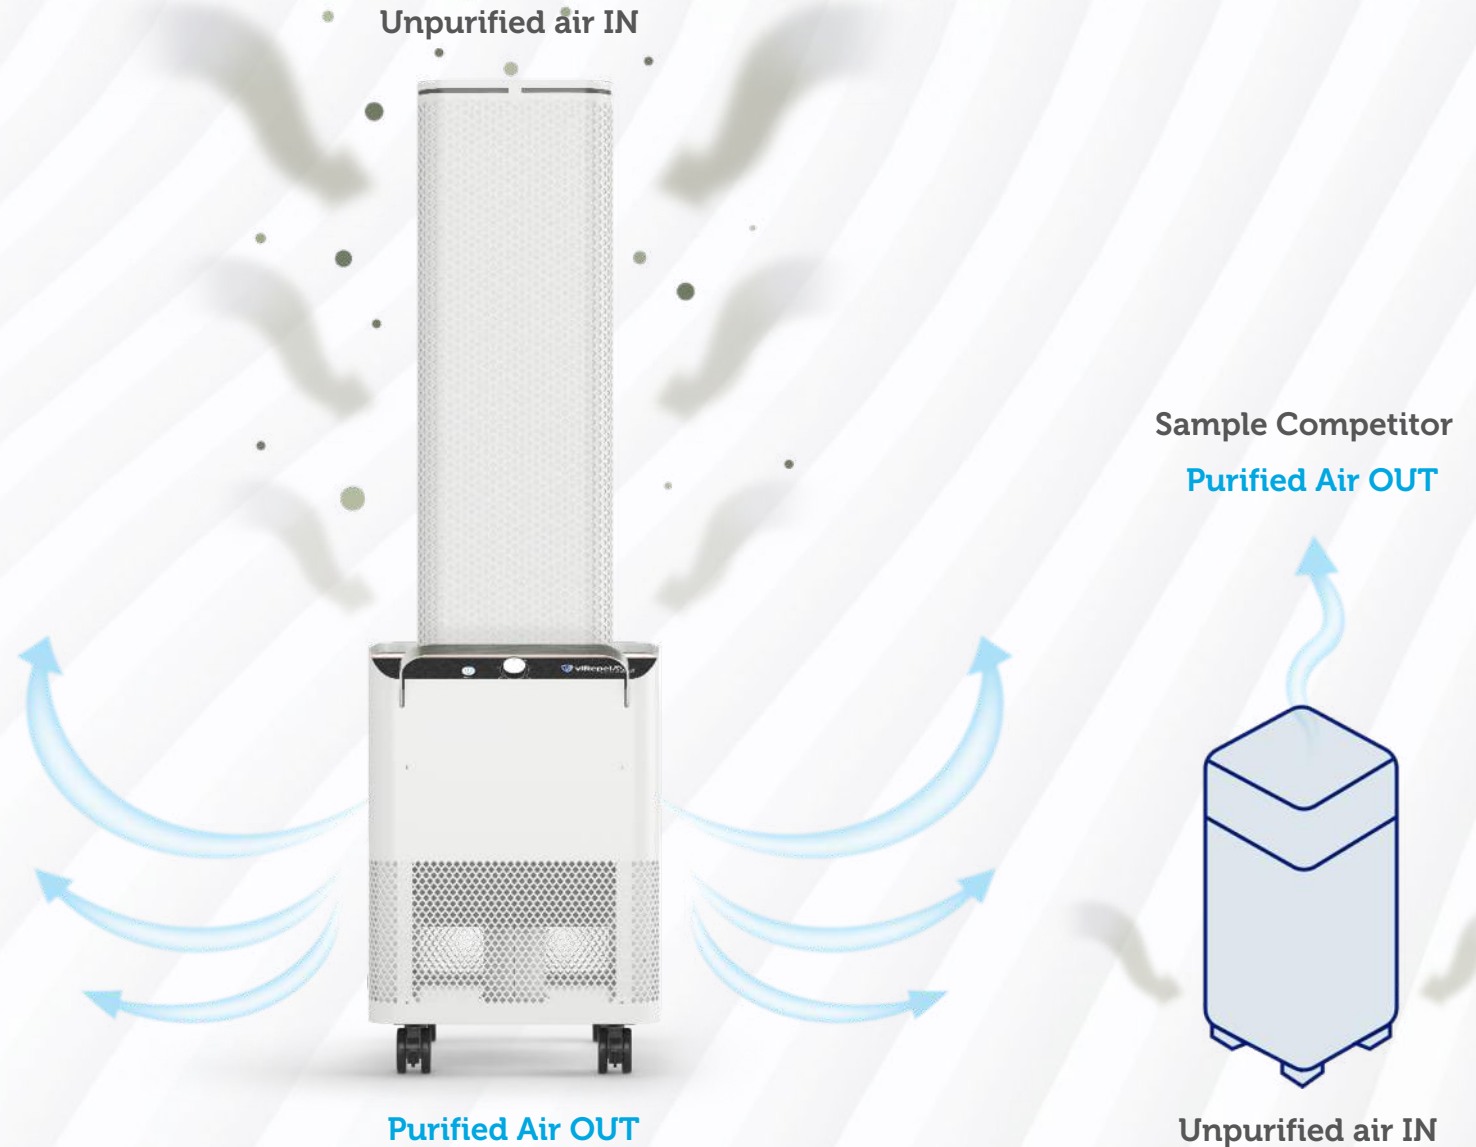

Other brands' HEPA filter surface area

HOSPITAL INSPIRED Air Flow Processing

Most hospitals construct their HVAC air flow processes to filter unpurified air from above (where we breathe) and emit clean air from below.

The viRepel AP Elite is the only portable air purifier in its class that follows this process, **absorbing dirty air at 360 degrees from the Danger Zone** (where people breathe, talk, sneeze, etc.) and emitting purified air from below.

OPTIMIZED Radial Clean Air Dispersion

The viRepel AP Elite draws unpurified air in from 360 degrees and emits clean air out from all four sides, producing **the most holistic air purifying experience**.

Competitors

LOWEST Maintenance & Easy to Use

The viRepel AP Elite is virtually maintenance free and easy to maneuver and operate.

The long-life HEPA H13 filter is recommended for replacement after 24 months, compared with as low as 3 months for competitors.

With our **365 Programming™**, you can schedule your viRepel AP Elite to run whatever schedule you want; no need to turn it on and off.

OTHER LEADING PERFORMANCE FEATURES

Portability. Hospital-grade casters make the viRepel AP Elite easy to manoeuvre.

365 Programming™. Set your viRepel AP Elite to turn on and off anytime, any day.

Quiet. At 40-70 dBs, the viRepel AP Elite produces similar noise levels as competitive units that perform at much lower CADR rates.

Customizable. Our clean design blends into most environments. Customized graphics are available.

The viRepel AC Elite is Proudly Made in Canada.

Medical grade custom HEPA H13 filter

Tall radial tower

High air exchange 3-5x faster than others

Multi-directional airflow

Mobile

TECHNICAL DETAILS

PERFORMANCE

- Removes 99.95% of particles at 0.3 microns
- 1100 CFM/CADR – fully adjustable
- 120 voltage, 60 HZ; suitable for standard 15 AMP receptacles
- Hospital-inspired air intake from the Danger Zone (above waist level)
- Odorless
- Does not cause irritation or any health hazard including but not limited to risk of electric shock

SPECS

- Height 65"
- Base Length/Width: 19" x 19"
- Tamperproof (optional)
- Electrical Safety Code certified

NOISE

40-72 dba

3-LAYER FILTER PROTECTION

- **Pre-filter** (captures large particles)
- **Carbon Filter** (reduces odors)
- **HEPA H13 Filter** (captures 99.95% of harmful particles)

AIR FLOW

- Multi-directional

MOBILITY

- TENTE hospital-grade castors
